About Me

From the moment I produced "Hello World" in the console of my first application, I knew I was hooked into the world of software development. But software development has never been "just a job" for me, it's offered an engaging challenge to continually learn and improve my skills in creating high-quality software. What started with a simple "Hello World" has become a full-fledged passion that only gets more exciting.

Skills

- Semantic HTML5
- CSS3 / BEM
- Sass / Scss
- JavaScript / ES6+
- Git / GitHub
- Command line / npm
- Bootstrap / jQuery
- Mobile-first responsive layout
- Cross-browser compatibility

Experience

* All projects devised with HTML5, CSS3 / SCSS and JavaScript

Employee Directory API (https://bit.ly/3ouFmJl)
Request a JSON object from the Random User Generator API and display 12 users along with basic information. A modal window will pop up when a user is clicked and can filter the directory by name.

Game Show App (https://bit.ly/3v3pH5X)
A browser version of "Wheel of Success" a word guessing game. Uses DOM traversal and responds to user interaction from an on-screen keyboard.

WebApp Dashboard (https://bit.ly/2T4avHT)
A responsive student dashboard with JavaScript charts, autocomplete feature that list names matching the search term, utilize local storage to save settings and DOM manipulation.
Replaced raster images with scalable vector graphics.

Interactive Photo Gallery (https://bit.ly/3wiDu99)
A photo gallery using JavaScript and CSS grid. When a thumbnail is clicked, the photo will appear in a lightbox. User can then cycle through photos with "back" and "previous" arrows

Education

University of Florida	*Bachelor of Science in Public Relations*	*Concentration in Communication*
Treehouse	*Front End Web Development*	*Concentration in Web Applications*
Udemy	*Complete JavaScript 2021*	*Concentration in JavaScript*
